Professional Summary

Full Stack Developer with 5 years of experience designing and developing scalable, high-performance web applications using Angular, React.js, Node.js, and cloud-native technologies. Experienced in building enterprise-grade platforms, admin dashboards, workflow management systems, and AI-powered applications with strong expertise in frontend architecture, backend development, API integration, and database design. Specialized in leveraging AI coding agents and modern development workflows to accelerate SDLC, automate complex implementations, and seamlessly integrate AI-powered solutions into business-critical applications and enterprise workflows.

TECHNICAL SKILLS

Frontend: HTML5/CSS/JS, Typescript, Angular, React, Bootstrap, Tailwind CSS
Backend: Node.js, Express.js
Databases: PostgreSQL, MongoDB
Tools: GitHub, Postman, Vs Code, Cursor, GitHub Copilot, Excel, PowerPoint, Word
Other: REST APIs, JWT, WebSockets, JSON

PROFESSIONAL EXPERIENCE

Full Stack Developer - London Eyes

Aug 2021 – Jun 2022

Tech Stack: React.js, Angular, Node.js, Express.js, PostgreSQL

- Developed and maintained a modern company website using React.js with responsive UI and optimized performance.
- Built and managed an enterprise admin dashboard using Angular for employee management and operational monitoring.
- Developed modules to manage employee data, work assignments, task tracking, and reporting workflows.
- Implemented advertisement upload and management functionality for marketing and promotional campaigns.
- Designed and developed REST APIs using Node.js and Express.js for secure frontend-backend communication.
- Structured and optimized PostgreSQL databases for employee records, work management, and advertisement storage.
- Implemented authentication and role-based access control for secure administrative access.
- Collaborated with designers and stakeholders to improve UI/UX and business workflow efficiency.
- Worked on debugging, application optimization, and deployment support for production environments.

PROJECT HIGHLIGHTS

London Eyes Website

Tech Stack: React.js, Node.js

- Built a responsive business website using React.js and modern frontend development practices.
- Developed reusable UI components for improved scalability and maintainability.
- Optimized frontend architecture to enhance website performance and user experience.
- Integrated backend REST APIs and dynamic content management functionality.
- Ensured mobile responsiveness and cross-browser compatibility.

Employee Management Admin Panel

Tech Stack: Angular, Express.js, PostgreSQL

- Developed a complete Angular-based admin dashboard for employee management and operational monitoring.

- Built modules for employee records, task assignments, reporting, and workflow tracking.
- Implemented secure authentication and role-based access control for administrators and employees.
- Designed and integrated RESTful APIs using Express.js for seamless frontend-backend communication.
- Structured and optimized PostgreSQL databases for efficient employee and operational data management.

Advertisement Management System

Tech Stack: Angular, Node.js, PostgreSQL

- Developed a centralized advertisement upload and management module for company promotional campaigns.
- Built interfaces for creating, updating, organizing, and managing advertisements.
- Integrated backend APIs for secure media upload and advertisement handling.
- Implemented database management for storing advertisement metadata and content.
- Enhanced admin usability with responsive UI components and management workflows.

Full Stack Developer - Hogoza

Jul 2022 – Dec 2024

Technologies: Angular, React.js, Node.js, Express.js, PostgreSQL, MongoDB

- Developed and maintained online booking and reservation platforms serving large numbers of users across multiple services.
- Built scalable frontend applications using Angular and React.js with responsive, user-friendly interfaces.
- Designed and implemented RESTful APIs using Node.js and Express.js to support booking, payment, and user management workflows.
- Integrated third-party payment gateways and notification services for seamless customer experiences.
- Developed real-time booking status updates and user notifications using WebSocket-based communication.
- Optimized PostgreSQL database schemas and queries to improve performance and reliability.
- Implemented authentication, authorization, and role-based access control for customers, operators, and administrators.
- Collaborated with cross-functional teams to deliver new features and improve platform scalability.
- Participated in code reviews, testing, deployment, and production support activities.

Project Highlights

Online Reservation Platform

Tech Stack: Angular, Node.js, PostgreSQL

- Developed a comprehensive reservation management platform for handling customer bookings and scheduling.
- Built modules for reservations, customer profiles, availability management, and reporting.
- Integrated payment processing and booking confirmation workflows.
- Optimized system performance to support high-volume booking operations.

Operations & Admin Dashboard

Tech Stack: Angular, Express.js, PostgreSQL

- Developed an administrative dashboard for monitoring reservations, users, and operational performance.
- Built reporting and analytics modules for business insights and decision-making.
- Implemented role-based permissions and secure administrative workflows.

Senior Full Stack Developer - Shazel Company

Jan 2025 – Present

Tech Stack: Angular, React.js, Node.js, Express.js, PostgreSQL, MongoDB, AI Integrations

- Lead the development of enterprise web applications and digital transformation initiatives.
- Architect scalable frontend and backend solutions using Angular, React.js, Node.js, and Express.js.
- Design and implement secure APIs, database architectures, and cloud-ready application structures.
- Develop AI-powered business solutions integrating modern AI services and automation workflows.
- Improve development productivity through AI-assisted coding tools and automated development processes.
- Mentor junior developers and participate in technical planning, architecture decisions, and code reviews.
- Collaborate with stakeholders to translate business requirements into scalable technical solutions.
- Drive performance optimization, application security, and deployment best practices.

Project Highlights

Enterprise Workflow Management System

Tech Stack: Angular, Node.js, PostgreSQL

- Designed and developed a workflow management platform for business process automation.
- Implemented task management, approval workflows, notifications, and reporting systems.
- Built scalable APIs and optimized database structures for enterprise-level performance.

AI-Powered Business Assistant Platform

Tech Stack: React.js, Node.js, AI APIs

- Developed AI-driven solutions to automate business operations and improve productivity.
- Integrated AI services for document processing, content generation, and workflow automation.
- Implemented secure API integrations and scalable backend architecture.

Business Analytics Dashboard

Tech Stack: Angular, Express.js, PostgreSQL

- Built interactive dashboards for monitoring KPIs and operational metrics.
 - Developed real-time reporting and visualization features.
 - Enhanced decision-making through centralized analytics and data insights.
-

Freelance Projects

Freelance Full Stack Developer

Delivered custom web applications and business solutions for clients across different industries using Angular, React.js, Node.js, Express.js, PostgreSQL, and MongoDB.

Taraf Platform

- Developed a full-featured e-commerce platform with product management, shopping cart, order processing, and payment integration.
- Built secure authentication and role-based access control.
- Implemented responsive UI and optimized backend performance.

Learning Management System (LMS)

- Designed and developed an online learning platform with course management, student enrollment, and progress tracking.
- Built admin dashboards for instructors and platform administrators.
- Integrated media management and assessment features.

Real Estate Management Platform

- Developed a property listing and management platform with advanced search and filtering capabilities.
- Built CRM features for lead management and client communication.
- Integrated location-based services and property analytics.

Restaurant Ordering System

- Created an online ordering and management system for restaurants.
- Implemented menu management, order tracking, and customer notifications.
- Developed administrative dashboards for operational management.

AI-Powered Content Management Platform

- Built content generation and management tools utilizing AI integrations.
- Implemented workflow automation and content approval processes.
- Designed scalable APIs and modern frontend interfaces.

Education

Bachelor's Degree in Mechanical Engineering — Cairo University
